

MINI-PROJECT

PROPOSAL

PROGRAMMING FUNDAMENTALS

(CT - 175)

Name	Musaib Dal
Roll No	TCT-003
Batch	2nd batch
Year	2020-21

Department of Computer Science & Information
Technology, Thar Institute of Engineering Science and
Technology. NED University of Engineering & Technology.

Title of Project:

Random Password Generator:

➤ Purpose of the project:

- The Random Password Generator is a simple project developed using python. This project is a command based which helps in creating unique password from the size of users input. This project is an interesting and simple project. The project is not completely functional.

About the working of the project:

This Password Generator application is designed for creating random strong password without any length limits. In this application, you can input the size or length of the password, you want to generate, then press enter. Then you will get the unique password. Also, the design of this system is pretty simple so that the user won't get any difficulties while working on it.
